CAREER SUMMARY

A passionate software developer with strong problem-solving skills and **more than 3 years** of experience building modern web applications. Skilled in Java, Spring Boot, Microservices, REST APIs, Windows Batch scripting, ReactJS, Spring Security, Hibernate/JPA, and MySQL. Previously worked on a project with **MetLife**, a leading global financial services company serving **90M+** customers across **40+** countries, optimizing production batch scripts for mission-critical insurance workflows. Eager to leverage my backend expertise and full-stack exposure to build scalable, secure, and high-performance applications in innovative environments.

SKILLSET

Programming skills: • Java OOP (Solved over 250 Leetcode/GFG problems) • Spring MVC • Spring Boot • Spring Security (Role-Based Authentication) • Spring Cloud • Spring Data JPA • Hibernate ORM • RESTful APIs • Servlets • JSP • Thymeleaf • Design Patterns • SOLID Principles
Frontend development: • ReactJS • Redux • JavaScript (ES6+) • HTML5 • CSS3 • Bootstrap • TailwindCSS • Responsive UI • Lazy Loading • Code Splitting
Databases: • MySQL • MongoDB • Cloud SQL • PostgreSQL
Version Control: • Git • GitHub • Jira • Confluence • Agile/Scrum Methodology
Testing: • JUnit • Mockito • Jest • Unit Testing • Integration testing • Regression Testing • API testing (Postman, Swagger)
Cloud and DevOps: • Google Cloud Platform (Cloud Run, Cloud Functions, Cloud Build, Cloud SQL) • AWS (EC2, ECS Fargate, S3, SNS, SQS, SES, DynamoDB, Lambda, Transcribe) • Docker • Kubernetes • Jenkins • CI/CD Pipelines
Other Tools and Concepts: • Microservices and Event-Driven Architecture • Apache Kafka • Monolithic to Microservices Migration • Batch Scripting (Windows, Unix) • Maven • NPM • Gradle • Yarn • Basics of Internationalization (i18n) concepts, Localization testing (l10n), Unicode, encoding standards, RTL/LTR text handling

EXPERIENCE

Cognizant

Dec. 2020 – Aug. 2022

Software Developer

- Built and maintained **RESTful API endpoints** using Java, Spring Boot, and Spring Data JPA, enabling seamless data exchange across microservices, improving data processing speed by **40%**.
- Developed and deployed **production-grade features** for insurance workflows, including policy renewal automation, claims validation, and batch updates, **reducing manual intervention by 40%**.
- Conducted production issue analysis by examining **application logs, exception traces, and DB queries**, identifying and resolving root causes for critical incidents within SLA.
- Integrated Kafka for event-driven message processing** between microservices, improving scalability and system reliability.
- Designed a **role-based access control** to enforce security policies across microservices, enhancing security and access control by **50%**.
- Improved policy lookup performance by **optimizing SQL queries** and introducing database indexing, cutting down average response time from 900ms to under 400ms.
- Automated build and deployment pipelines using **Jenkins, Git, Gradle, and Docker**, reducing manual effort and deployment time from hours to minutes.
- Integrated backend services with **third-party APIs** and front-end apps, increasing system reliability and reducing API failures by **25%**.
- Wrote **unit tests and automated regression tests** to ensure high-quality code, using JUnit and Mockito, increasing code coverage to **85%**.
- Collaborated in an Agile/Scrum environment with cross-functional teams of developers, QA, and product owners to deliver secure and high-performing applications for MetLife Insurance (banking/financial domain).
- Debugged and stabilized production batch scripts running on legacy MetLife systems, **reducing job failure rates from 15% to below 3%** for insurance workflows and claims processing.
- Automated policy batch jobs using Spring Batch, ensuring reliable generation of monthly reports, claim summaries, and payment schedules across multiple environments, while meeting **MetLife SLA requirements**.
- Selected **among top performers** in Cognizant internal training program for developing a full-stack project, implementing CRUD operations, REST APIs, and role-based authentication, demonstrating advanced technical skills and problem-solving abilities.

Nugen IT Services

Aug. 2019 – Nov. 2020

Web Developer

- Integrated **REST APIs with React frontend**, enabling seamless data flow between backend services and UI components.
- Developed and maintained **Java backend services** using **Spring Boot**, improving response times by **30%** for key workflows.
- Contributed to internationalization and localization testing, validating UI behavior, language consistency, and content rendering across regions.

- Built reusable React components and optimized frontend performance using **React hooks and Redux** for state management, improving application performance and **reducing load times by 20%**.
- Implemented Spring Data JPA for efficient MySQL operations, improving database **query efficiency** by **40%**.
- Developed responsive and intuitive user interfaces using React, Redux, and modern JavaScript frameworks, adhering to design thinking principles.
- Worked closely with designers and backend developers to deliver user-centric features with **pixel-perfect UI implementation**.
- Implemented **lazy loading and code splitting** to improve page load speed.

PROJECTS

BlogPost ([Live demo](#)) ([GitHub](#)) | *ReactJS, Redux, Firebase authentication, Firestore database, Bootstrap*

Nov 2025

- Built a **full-stack blogging application** using React and Firebase Firestore with **real-time data synchronization**.
- Implemented **Google Authentication with Firebase** Auth for secure login/logout and user-specific actions.
- Developed a **Like/Dislike** system with per-user tracking, live counters, and instant UI updates using optimistic rendering.
- Enabled real-time updates across users using Firestore onSnapshot, eliminating manual refreshes.
- Added advanced post sorting (Newest, Oldest, Most Liked) with stable tie-break logic for consistent UX.

Food Order Application ([GitHub](#)) | *React, Firebase*

July 2024 – Aug 2024

- Built a cloud-hosted web app for online ordering, integrating real-time database updates using Firebase.
- Provides users with a seamless experience to view menus, select items, add meals to the cart, and place orders.
- Leveraged Firebase Realtime Database to store and manage data efficiently.

Warzone Game Development ([GitHub](#)) | *Java*

Sep 2023 – Nov 2023

- Designed and developed a **strategy-based multiplayer game** inspired by Warzone, using object-oriented principles and software design patterns like State, Command, Observer, Adapter, and Strategy.
- Designed a user-friendly command-line interface for editing maps, managing gameplay, and issuing orders, with real-time validation and error feedback.
- Enabled saving and restoring the game state, supporting resumption of gameplay from saved progress.
- Developed 50+ unit tests to ensure functionality, including map validation, player behavior, reinforcement calculations, and game save/load accuracy.
- Maintained coding standards, architectural modularity, API documentation, and version control with continuous integration pipelines for automated builds and testing.

Certifications

- The Complete Full-Stack Web Development Bootcamp by Dr. Angela Yu – Covered HTML, CSS, JavaScript, Node.js, React, PostgreSQL, Web3, and DApps (4.7/5.0 rating, 4.5M+ users).
- React – The Complete Guide by Maximilian Schwarzmüller – In-depth ReactJS course including hooks, Redux, and modern practices (4.6/5.0 rating, 2.3M+ users).
- Low-Level System Design, Design Patterns and SOLID Principles by Prateek Narang – Practical course on software architecture and best practices (4.6/5.0 rating, 1100+ users).
- Git and GitHub Masterclass: The Practical Bootcamp

EDUCATION

Concordia University

Master of Applied Computer Science

Guru Nanak Dev University

Bachelor of Technology in Computer Science Engineering

Montreal, Canada

Sep. 2022 – Jun. 2024

Punjab, India

Jul. 2016 – Jun. 2020

Community and Interests

- Actively explore open-source projects to stay updated with modern frameworks and coding practices.
- Share knowledge with peers through informal mentoring, collaborative debugging, and technical discussions.
- Passionate about continuous learning, with strong interest in cloud technologies and scalable backend systems.
- Regularly practice problem-solving and algorithmic challenges to strengthen coding skills and improve technical depth.
