

Jatin Chhabra

jatin.chhabra772@gmail.com | [LinkedIn](#) | [Portfolio](#) | [Leetcode](#)

A passionate software developer with strong problem-solving skills and **3 years** of experience building modern web applications. Contributed to a USA based project with **MetLife**, a global financial services leader serving **90M+ customers across 40+ countries**, by optimizing production batch scripts for mission-critical insurance workflows.

SKILLSET

Programming skills: Java OOP (**Solved over 250 Leetcode/GFG problems**), C++, Spring MVC, Spring Boot, Spring Security (Role-Based Authentication), Spring Cloud, Spring Data JPA, Hibernate ORM, RESTful APIs, Servlets, JSP, Thymeleaf, Design Patterns, SOLID Principles

Frontend development: ReactJS, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, TailwindCSS, Responsive UI

Databases: MySQL, MongoDB, Cloud SQL, PostgreSQL

Version Control: Git, GitHub, Jira, Confluence, Agile/Scrum Methodology

Testing: JUnit, Mockito, Jest, Unit Testing, Integration testing, Regression Testing, API testing (Postman, Swagger)

Cloud and DevOps: Google Cloud Platform (Cloud Run, Cloud Functions, Cloud Build, Cloud SQL), AWS (EC2, ECS Fargate, S3, SNS, SQS, SES, DynamoDB, Lambda, Transcribe), Docker, Kubernetes, Jenkins, CI/CD Pipelines

Other Tools and Concepts: Microservices and Event-Driven Architecture, Apache Kafka, Monolithic to Microservices Migration, Batch Scripting (Windows, Unix), Maven, NPM, Gradle, Yarn

EDUCATION

Master of Applied Computer Science <i>Concordia University – Montreal, Canada</i>	Sep. 2022 – Jun. 2024
Bachelor of Technology in Computer Science Engineering <i>Guru Nanak Dev University – Punjab, India</i>	Jul. 2016 – Jun. 2020

EXPERIENCE

Cognizant – Java Full Stack Developer	Dec. 2020 – Aug. 2022 <i>Kolkata, India</i>
- Built and maintained RESTful API endpoints using Spring Boot, and Spring Data JPA, enabling seamless data exchange across microservices, improving data processing speed by 40%. - Designed a role-based access control to enforce security policies across microservices, enhancing security and access control. - Wrote unit tests, automated regression tests to ensure quality code, using JUnit and Mockito, increasing code coverage. - Streamlined deployment processes by implementing DevOps automation and CI/CD pipelines using Jenkins, Git, and Nexus to automate builds and deployments, reducing deployment time from hours to minutes, for release reliability. - Partnered with the product management team to gather requirements & actively participated in calls to address technical issues. - Ensured production batch scripts were up to date, efficient, and error-free, while meeting MetLife SLA requirements.	
Nugent IT Services – Web Developer	Aug. 2019 – Nov. 2020 <i>Punjab, India</i>
- Integrated REST APIs with React frontend, enabling seamless data flow between backend services and UI components. - Developed and maintained Java backend services using Spring Boot, improving response times by 30% for key workflows. - Built reusable components and optimized frontend performance using react hooks and redux, improving application performance. - Implemented Spring Data JPA for efficient MySQL operations, improving database query efficiency by 40%. - Implemented lazy loading and code splitting to improve page load speed.	

PROJECTS

BookVault ([Run Live](#)) ([GitHub](#)) | *React, Node.js, Express.js, json-server, json-server-auth*

- Developed, a full-stack web application, featuring real-time data fetching from a JSON-based database.
- Handled **secure configuration** with environment variables and configured **CORS** for safe frontend–backend communication.
- Implemented RESTful APIs with **authentication and authorization using json-server-auth**, enabling secure management of products, featured items, orders, and users.

BlogPost ([Run Live](#)) ([GitHub](#)) | *ReactJS, Redux, Firebase authentication, Firestore database, Bootstrap*

- Built a **full-stack blogging application** using React and Firebase Firestore with **real-time data synchronization**.
- Implemented **Google Authentication with Firebase Auth** for secure login/logout and user-specific actions.

- Enabled real-time updates across users using Firestore onSnapshot, eliminating manual refreshes.

Blog Application ([GitHub](#)) | *Spring boot, Spring security, JWT, Spring data JPA, MySQL database*

- Built a robust RESTful API for blog application featuring POSTs, COMMENTS and CATEGORY management.
- Integrated **JWT authentication and role-based authorization**, safeguarding access to API endpoints.
- Enriched developer experience with **Swagger documentation**, offering an intuitive interface for interacting with API endpoints.

CERTIFICATIONS

- The Complete Full-Stack Web Development Bootcamp by Dr. Angela Yu (Udemy)
- React – The Complete Guide by Maximilian Schwarzmüller (Udemy)
- Low-Level System Design, Design Patterns and SOLID Principles by Prateek Narang (Udemy)
- Git and GitHub Masterclass by Shubham Sarda (Udemy)
